

Please reject the NAB's petition 04-160. I choose to pay for a service that XM provides because I find it valuable and superior to any local alternative. XM's traffic and weather channels are more in depth and offer more detailed coverage than local stations. XM stations offer a real advantage as listeners can dial in on an "as needed basis". Local stations frequently offer reports in the morning and afternoon drive times, but try getting a traffic report during their chosen off-peak times. I can dial into my XM traffic and weather channel anytime and get the information that I need when I need it. This is one reason I choose to pay for my XM subscription. Respectfully, I would ask that you allow the free market to prevail and allow those who choose to pay for satellite radio choose their own programming.
